1888.

CORRESPONDENTS are requested to send early orders, thus giving me time to enter them in my books before I leave for New York. It is not an uncommon thing for me to have a greater number of orders than there are lots in the catalogue and many often arrive too late. Writing as I do, with difficulty, it is very desirable that those who wish to entrust their orders to me, should send them as early as possible, that they may receive proper attention. Address as below ; but late orders may be sent to me at New York, care of the auctioneers.

The coin dealers of New York, Baltimore, Philadelphia and Lancaster, Pa., will also receive and faithfully execute bids that may be placed with them. As many inquiries are sent me asking for catalogues to complete files, I have prepared a printed list of those that can be supplied, neatly priced in ink, to the 101st inclusive, which will be sold at prices named. This list will be sent on application.

A notice concerning this token may be seen in an early volume of the Magazine of History, the exact name of which I cannot call to mind; and I believe it to be the rarest of all American tokens known. Its great rarity cannot be questioned.

SOMMER ISLANDS MONEY.

1457 The Sommer Islands SHILLING. This piece was first sold in the celebrated Mickley Collection, in 1867. It is of shilling denomination, and a fair impression, bearing on one side a hog and on the other a ship, full-rigged, with the denomination XII. In my 95th Sale 1475, a poorer example than this brought \$110. It was purchased by Mr. Fire of Chicago.

Sommer Island SIXPENCE. The ship, or obv. side of this piece is fairer than the other side. The rev., the hog, is better even than the Shilling, and it can scarcely be considered less than a fine piece, considering its remarkable rarity.

Sommer Island THREEPENCE. Device the same as the preceding. The hog side fully equal to the two last. The ship is a less fair impression, still very fair for a coin of its age.

Sommer Island TWOPENCE. The same device as the Shilling, Sixpence and Threepence. Its quality is about the same as the Sixpence. The hog side a little better than the ship, though both are of about the same quality.

These are undoubtedly the earliest coins struck for America. I bought them for the extraordinary price of \$450.00 for the set of four. They were recently discovered in Bermuda, where they have been since their striking. I purchased them from Mr. Steigerwalt, who enjoys the distinction of obtaining the largest sum ever paid in America for four copper coins as a series. As a set, so far as I know, they still remain *unique*. They are now offered for the first time at auction, and they have *never until now been offered*, at public or private sale, in but a single instance. I have been told that another complete set exists in the collection of Mr. Parmelee; of the truth of this statement I am uninformed, and cannot therefore vouch for it. The set is now offered at a limit of \$450, the exact price paid for it to Mr. Steigerwalt. They have long been known, in fact ever since the days of Capt. John Smith, by whom they were described in his travels.

Many private collectors, Public Libraries, including the Boston Public Library, Masonic Lodges and other Institutions, have thought it worth their while to obtain complete sets of the series of these catalogues.

They are printed in extra style, on heavy tinted paper, solely for the use of collectors, and as they are furnished at actual cost, they can be obtained only of the undersigned, since no inducement can be held out to dealers to handle them.

General orders may be sent for the future issues, which will be forwarded as the series is continued, thus avoiding the trouble of a separate order for each catalogue.

Orders are respectfully solicited.
